Structure of 3-layer surgical masks:

- Outer layer: Should be waterproof to help protect against droplet spray
- Middle layer: Designed to be a particle filter to help block pathogens
- Inner layer: Should be water absorbent to help absorb breathed out moisture

LEGAL INFORMATION AND DISCLAIMER

Many surgical masks and other personal protective equipment (PPE) are regulated by FDA, NIOSH and other authorities. Government regulations restrict the sale, distribution and donation of PPE without proper authorization. While stockd, and its affiliates, including Premier, Inc., are not encouraging the sale or distribution of surgical masks or other PPE, etc., made to these specifications, individuals or entities that decide to make surgical masks for personal use or use in clinical or other settings do so at their own risk. Consult local hospital requirements, clinical guidelines for COVID-19 safety or applicable FDA, CDC, NIOSH or other government agency guidelines for additional information or guidance, etc.
